Re: FY2011 Applications for Funding for backup generators

Dear Senator Lugar:

On behalf of the Town of Munster, I am requesting funding for the purchase of backup generators for the storm and sewer pump stations throughout the Town of Munster. This project is particularly important in light of the 2008 flood when the area was able to see the devastation of the Calumet Avenue pump station going down.

By installing backup generators on the remaining pump stations in Munster, we will be able to eliminate sewage backup and flooding of basements throughout Town as a result of power outages. This will be able to ease resident concerns and save property from future damage.

We are prepared to provide any additional information that your office may need. Please contact Tom DeGiulio 219-836-6905 or James Mandon 219-836-6995.

I remain,

Yours truly,

John Edington
President, Munster Town Council
